## **Loss of Mobility—The moving and handling journey**

**This Practical session is aimed at Adult and Child Care in a Community Setting at Novice and Experienced Trainers**

### **Biography :**

### **Abstract :**

This session is designed to provide an insight into the decision making process for equipment for clients as they move through stages of loss of mobility. The content will cover:

- Maintaining independence
- Impact of mobility on Moving and Handling
- Age related mobility loss and degenerative conditions
- Considering the Person, Environment, Occupation model
- How PEO and TILEE come together in decision making
- Financial and logistical constraints.

### **Objectives :**

- Understanding the process of loss of mobility and degeneration
- Techniques and equipment to assist in maximising independence
- A balanced and forward thinking approach when making decisions on moving and handling equipment selection
- An overview of relevant equipment for sustainable care package
- Passive and end of life care – Moving and handling with care, comfort and dignity.
